

## OWNERSHIP

# Identify ownership of domains and websites

With WHOIS data becoming less accessible, the need for a GDPR-compliant tool to determine domain ownership is higher than ever

The screenshot displays the 'Ownership Search Engine' interface. On the left, a sidebar contains navigation icons. The main panel shows a search for 'www.hb\*.com' with 12,416 records. Filters for 'Country' and 'City' are active. A table lists results with columns for Hostname, Country, and Score. A detailed view for 'www.hb\*.com' is shown on the right, listing matching fields and their scores.

Hostname	Country	Score
1 www.stevenh*.com	USA	
2 www.hb*.com	Canada	
3 kellybaumgardner.com	USA

**Hostnames**

- bringyour\*\*\*backonline.net
- canlog\*\*\*8bit.com
- catweekton\*\*\*.com
- don\*\*\*drumpf.com
- dotgotas\*\*\*.com
- eurphoriaresour\*\*\*.com
- hb\*\*\*emmys.com
- hb\*\*\*express.com
- h\*\*\*mobile.com
- h\*\*\*voyeur.com

**Results for hb\*.com**

We matched based on the following fields.  
The number shown behind the property is a weighing factor for total score.

**Matching fields**

Field	Score
Redirect hostname	0.47
Whois organization	0.36
MX Domain	0.18

## Key benefits

## Retrieve domains and websites owned by the same registrar or company

Analyze and determine ownership based on multiple unique attributes such as contact information, Google Analytics ID, business registry number, ZIP code, IP address, website content and DNS records. Find all unique matching fields and how close the matches are to ascertain ownership. Use historical web data to track changes in the past, for example, if an address has remained the same or changed multiple times. That way, you can trace a domain back to its roots, uncover hidden connections between domains and identify unique characteristics shared between websites.

The screenshot shows a web application interface with a search bar at the top containing a magnifying glass icon and the word 'website'. Below the search bar is a table with two columns: 'Ownership' and 'Match'. The 'Ownership' column contains six rows, each with a small yellow square icon followed by a long yellow horizontal bar. The 'Match' column contains six rows, each with a blue checkmark icon. The table is enclosed in a blue border.

## Discover online infringement in a structured way

Protect your trademark from infringing domain names and fake websites. Brand infringers often use multiple domains or websites for their fraudulent activities, such as selling counterfeit products or setting up scam websites to steal personal data. Ownership gives you the power to detect associated domains to prove a pattern of infringing behavior. Also, you can identify changes to websites and use them as evidence in dispute resolutions.

## Successfully manage your domain portfolio

Use Ownership to manage and monitor domain registrations, protect your domains and identify intangible assets and their owners. Discover if websites fill in the same information as the domains in your portfolio and whether the information on your domains is used with malicious intent. Explore the digital footprint of a business: identify associated websites and shared ownership as well as potential client's digital assets. Get a comprehensive overview of the domains under your management, so you can put the right domain name policy and strategy in place.

## Get started

Whether you need actionable insights for day-to-day projects or for long-term strategies, our structured web data has the answer.
