Detect digital infringement with our unique Trust grade

Discover websites that are registered and used in bad faith. Our Trust grade identifies websites that might be exploiting your brand's trademark or require authorization to use it. Download your datasets to take action right away and use the data as evidence to build your brand infringement claim.

Discover entire clusters of fraudulent websites to catch all copycats

Detect duplicate websites that have a similar HTML structure and quickly uncover an entire cluster of nearly identical websites that most likely roll up to the same owner. Apply our Trust grade to find one fraudulent website and easily retrieve all other near duplicates that share the same properties by applying our Fingerprint feature.

The screenshot shows a web application interface for 'OWNERSHIP BETA'. At the top, there's a header with the tool name and a 'BETA' badge. Below the header, the domain 'www.targ*t.com' is entered. To the right of the domain, there are two buttons: a blue 'CSV' button with a download icon and a grey 'X' button. Below the header, there is a table with two columns: domain names and status indicators. The table lists several domains associated with 'targ*t.com', each followed by a green square containing the letter 'A'.
