

CYBERSECURITY

Enrich your asset discovery data to tackle cybersecurity threats

Just like companies, digital assets grow over time. You start with a domain name and a server for your website and gradually add more domains, subdomains and machines. They require regular maintenance, but this is often overlooked. How can you keep a complete overview of all the domains you own including the installed hardware and software? Unmanaged, outdated digital assets are an entry for cybercriminals to the network of your company, so it's crucial that you keep a comprehensive profile in order to get rid of them or secure them.

The screenshot shows the 'Security' search engine interface. At the top, there are buttons for 'Share', 'Save', and 'Export'. Below the search bar, filters are set to 'Response' and 'SSL certificate', resulting in 77,235,296 records. The date is set to 'Feb 2023'. The interface includes tabs for 'Sheet', 'Statistics', 'Maps', 'Trends', and 'Churn'. The 'Sheet' tab is active, displaying a table with the following columns: Hostname, SSL certificate, SSL issuer orga..., SSL start date, SSL end date, and SSL type. The table lists 12 records, each with a hostname, a 'Yes' status for the SSL certificate, an issuer (Cloudflare or Let's Encrypt), start and end dates, and a validation type (Organization Validation or Domain Validation).

	Hostname	SSL certificate	SSL issuer orga...	SSL start date	SSL end date	SSL type
1	od***a.nl	Yes	Cloudflare	Apr 28, 2022	Apr 28, 2023	Organization Validation
2	gran***asin.com	Yes	Let's Encrypt	Jan 27, 2023	Apr 27, 2023	Domain Validation
3	imp***url.dk	Yes	Let's Encrypt	Dec 27, 2022	Mar 27, 2023	Domain Validation
4	www.uitgeve***nten.nl	Yes	Let's Encrypt	Jan 5, 2023	Apr 5, 2023	Domain Validation
5	hi***o.com.au	Yes	Let's Encrypt	Feb 1, 2023	May 2, 2023	Domain Validation
6	de***stee.nl	Yes	Let's Encrypt	Jan 29, 2023	Apr 29, 2023	Domain Validation
7	si***l.pl	Yes	Let's Encrypt	Dec 30, 2022	Mar 30, 2023	Domain Validation
8	shop.***let.pl	Yes	Let's Encrypt	Jan 5, 2023	Apr 5, 2023	Domain Validation
9	www.***opmaat.nl	Yes	Let's Encrypt	Dec 26, 2022	Mar 26, 2023	Domain Validation
10	ki***ic.nl	Yes	Let's Encrypt	Dec 13, 2022	Mar 13, 2023	Domain Validation
11	www.***terbanden.info	Yes	Let's Encrypt	Dec 28, 2022	Mar 28, 2023	Domain Validation
12	www.ev***l.nl	Yes	Let's Encrypt	Feb 7, 2023	May 8, 2023	Domain Validation

FIND HIDDEN DIGITAL ASSETS

Protect your organization's digital assets by identifying vulnerabilities with web data

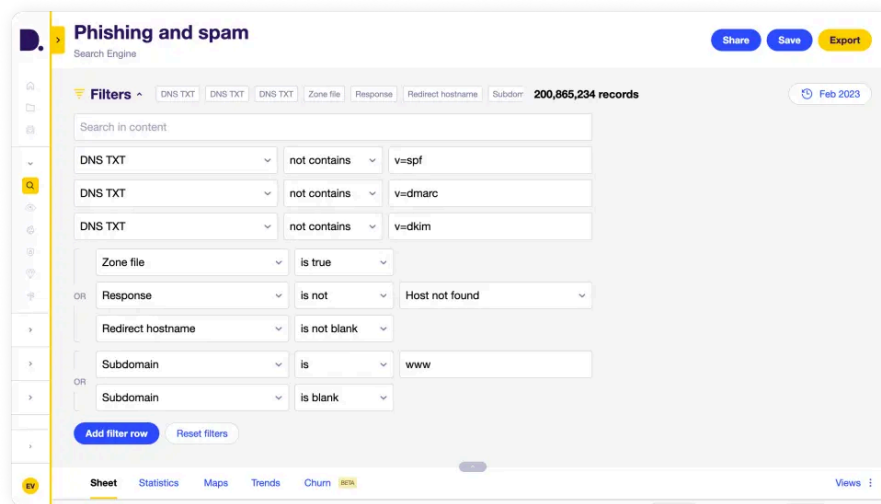

The screenshot shows the search engine interface for the domain 'www.nike.com'. The search results show 1 record for the hostname. The 'Domains' section lists 2,131 domains, each with a 'Match' status (indicated by a green 'A' icon). The domains listed include 306***gs.com, 32south***.com, ***shop.com, nike***acad.com, nike***day.com, nike***go.com, nike***ab.com, nike***run.com, nike***ced.com, sn***kr.com, sn***krs.com, the***enkr.com, waffle***entertainment.com, ch***lorus, and convers***es.us.

Domains (2,131)	Match
306***gs.com	A
32south***.com	A
***shop.com	A
nike***acad.com	A
nike***day.com	A
nike***go.com	A
nike***ab.com	A
nike***run.com	A
nike***ced.com	A
sn***kr.com	A
sn***krs.com	A
the***enkr.com	A
waffle***entertainment.com	A
ch***lorus	A
convers***es.us	A

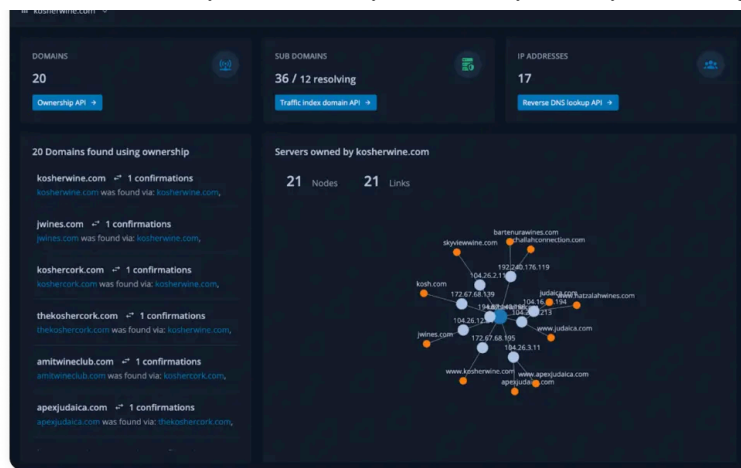

Monthly updated data for an overview of digital assets

Our web data helps you discover – on a monthly basis – new or unknown digital assets of your customers for your exploratory research. Integrate our data solutions into your vulnerability management system through API data points. This way, you can continuously discover new digital assets and inspect vulnerabilities such as outdated CMS versions, web server software, operating systems, misconfigured firewalls and expiring or missing SSL certificates.

Discover unknown digital assets of your customers

How is a company manifested on the internet? Enrich your data to discover unknown or new internet assets of your customers, including hosts, servers, domains and websites. Use our filters 'Domain' and 'IP address' in Search Engine and discover all your customers' domains. Integrate our Ownership API to detect associated domains and Reverse DNS to discover machines connected to them for a complete overview of your customers' digital assets. The data from our SSL Catalog tool allows you to find all related services.

Detect cybersecurity vulnerabilities in your customers' assets

Digital services present unique challenges for enterprises because of their ease of access by cyber attackers. Our data solutions are easy to integrate through APIs, so you can build a solid inventory of your customers' digital assets and monitor that they remain secure. You can detect different vulnerabilities in your customers' digital assets, such as open ports, outdated versions of CMS systems, expiring or missing SSL certificates, old PHP or Apache versions, possible causes for DNS attacks and many more. Use our web data for an ongoing discovery of cybersecurity risks.

Products

SSL Catalog

Monitor SSL certificate developments on a daily basis

- Map digital assets to detect security vulnerabilities
- Track SSL developments by certificate issuer, type, version or expiration date
- Find fraudulent websites based on issued SSL certificates

Reverse DNS

Find all servers of your customers' companies

- Discover machines connected to the domains you're analyzing
- Track changes every month
- Uncover the IP addresses of machines connected to a specific domain

Ownership

Trace any domain back to its roots, uncover hidden connections

- Uncover networks & ownerships
- Access historical data
- Retrieve associated websites
