The screenshot shows the 'Shopify' filters interface. At the top, there's a 'Filters' section with tabs for DNS TXT, DNS CNAME, Rendered hostnames, and Subdomain. Below this is a search bar labeled 'Search in content'. The main area contains several filter rows, each with a dropdown menu for the filter type, a dropdown for the operator, and a text input for the value. The filters are organized into groups separated by 'OR' labels. The first group includes filters for DNS TXT (contains shopify), DNS CNAME (is shops.myshopify.com), and Rendered hostnames (is cdn.shopify.com). The second group includes filters for Rendered hostnames (is fonts.shopifycdn.com) and Rendered hostnames (is shop.app). The third group includes filters for Subdomain (is blank) and Subdomain (is www). The fourth group includes filters for Subdomain (is shop) and Subdomain (is store). The final filter is for Response (is Available). At the bottom, there are buttons for 'Add filter row' and 'Reset filters'.

## EQUITY RESEARCH

## Explore the structured web for better investment opportunities

## Track the performance of publicly listed tech companies

Audit the performance of tech companies and find out more about a particular company's background for your alpha-generating strategy. Discover how many businesses across the globe use a particular web technology or service, so you can identify who is winning and losing market shares and better understand the popularity and development of the technology.

Discover signals that matter to the stock markets

Monitor the online growth and decline of companies. Our Traffic Index provides daily insights into website popularity and the payment and communications services a website uses. Find all relevant discovered subdomains and use this actionable intelligence as an indicator to track the alpha.

## Put data into objective perspective

Apply some of our unique Proprietary Scores – such as Economic Footprint, Heartbeat, Trust grade, and Cloud score – to filter our data with ease and get unbiased insights. For instance, the Economic Footprint determines the importance of a website compared to others from an economic point of view, and the Heartbeat grades the activity, (commercial) development and health of the website.

## Products

### Search Engine

Apply over 200 data variables to create a targeted search

- Search through our database
- Four years of monthly history
- Use Statistics and Trends
- Export CSV reports

### Traffic Index

Track the popularity of websites and different web services

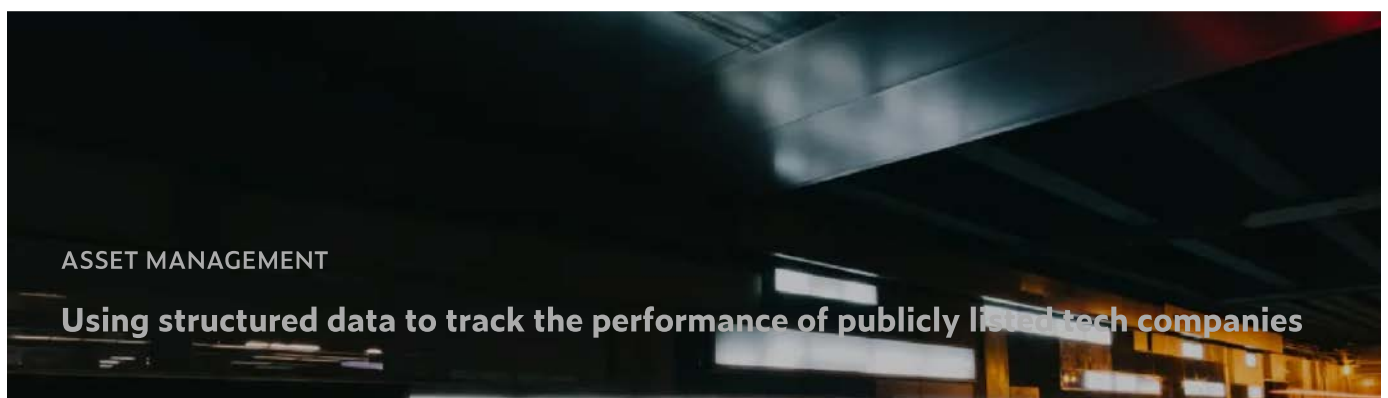

- Get daily insights into website popularity
- Find all relevant discovered subdomains
- View the popularity of services from publicly listed companies

### Reverse DNS

Gain insights into the online movement and expansion of businesses

- View what networks surround a domain
- Find URLs hosted on the same name servers
- Gain exhaustive domain insights
